Professional Profile

Jonathan Eisenberg is the Associate Manager in the Boston office of Rolf Jensen & Associates, Inc. (RJA). He has over nine years of fire protection engineering and eleven years of chemical processing plant experience, including process engineering and production management/engineering. His recent consulting experience includes fire protection requirements for hazardous materials use and storage in high-hazard, clean rooms, chemical plant processing, and laboratory applications and specification of fire protection features for hazardous materials storage and process areas including: sprinkler design basis, ventilation, explosion control, electrical classification, control area design, NFPA 45 laboratory unit design and NFPA 30 flammable liquid storage.

Eisenberg's experience also includes high hazard occupancy design; building and fire code requirements for combustible metals processing; fire protection and hazard evaluation of hydrogen generation, storage, and dispensing operations; code requirements and equivalencies for a BSL-4 facility and code compliance approaches for airport terminal facilities. Recently, his work has involved fire protection and separation requirements for bulk storage of solid and liquid oxidizers, as well as storage and processing of combustible dusts.

Professional Affiliations

National Fire Protection Association – Member

- NFPA 30 – Flammable and Combustible Liquids
- NFPA 30 – Operations
- NFPA 30 – Storage and Warehousing of Containers and Portable Tanks
- NFPA 318 – Clean Rooms

Society of Fire Protection Engineers – Member

American Institute of Chemical Engineers – Member

Salamander Honorary Fire Protection Engineering Society – Member

Credentials

Master of Science,
Fire Protection Engineering
Worcester Polytechnic Institute,
Worcester, MA, 2000

Bachelor of Science,
Chemical Engineering
Lafayette College, Easton, PA, 1987

Licences & Certifications

Professional Engineer

- Massachusetts (45248)
- Connecticut (24147)
