

Industrial

Protection For Industrial Facilities

We Understand The Challenges...

Modernization. As industrial companies strive to remain competitive in a global economy, they must upgrade processes, install new equipment and modernize plant facilities on a continuous basis. Because no plant can afford a threat to employees' safety or interrupted production, it is crucial for the fire protection and security consultant to be tasked with determining what impact any physical changes will have on the facility's life safety and security.

Master Planning. Complex industrial facilities demand a consultant capable of developing a comprehensive approach to fire protection and security. This process includes determining the objectives; selecting the proper systems for structural and special hazard protection; ensuring compliance with codes and standards; and overseeing system installation, testing and commissioning.

Education. The role of the consultant goes far beyond specifying the actual fire protection and security systems. The consultant must play an important role in making sure emergency response plans, policies and procedures are put in place; and that plant fire, safety and security personnel are trained to react to a variety of threats, from fires and chemical spills to security breaches.

A Sampling of Our Industrial Facilities Projects...

Amtrak Maintenance Facility - Chicago, IL

Brown-Forman - Louisville, KY

Carrier Corporation - Plant Expansion - Collierville, TN

Fedex Ground Warehouse & Distribution Center - Cobb County, GA

General Motors Corporation - Multiple Locations Worldwide

IM Flash Technologies (Intel and Micron Technology) - Lehi, UT

James Madison University - CISAT Laboratory - Harrisonburg, VA

Lonza Biologics - Portsmouth, NH

Los Esteros Critical Energy Facility - San Jose, CA

National Emerging Infectious Diseases Laboratory (NEIDL) - Boston, MA

National Semiconductor - Arlington, TX

Nuvera Fuel Cells - Cambridge, MA

PABCO Gypsum - Las Vegas, NV

PEMEX - Multiple Locations Worldwide

Pfizer Global Manufacturing Plant - Brooklyn, NY

Proctor & Gamble - Sharon Woods Tech Center - Blue Ash, OH

Schick Wilkinson Manufacturing Plant - Milford, CT

Toyota Parts Distribution Center - San Ramon, CA

Texas Instruments - Multiple Texas Locations

Wrigley Plant - Gainesville, GA

**Genzyme Corporate
Headquarters, Cambridge, MA**

**Duke University - Center for
Interdisciplinary Engineering &
Applied Science Laboratory,
Durham, NC**

ROLF JENSEN & ASSOCIATES, INC.
FIRE PROTECTION CONSULTANTS
